

## ADDITIONAL RESOURCES

Our partners at NHI (FHWA) have an abundance of courses, seminars and webinars available for you to take advantage of. We have listed below several other courses that will prepare you for success with administering local projects.

1. TCC Basic Construction and Maintenance Documentation—Improving the Daily Diary (FHWA-NHI 134071)
2. Introduction to Value Engineering (FHWA-NHI 134005A)
3. TCC Ethics Awareness in the Transportation Industry (FHWA-NHI 1340694)

We also have other training available through U.Va's Center for Transportation Studies (CTS). The Center oversees a comprehensive transportation program that includes education, research, and professional training. The professional training initiatives are supported by the U.Va Transportation Training Academy (TTA) and the Transportation Project Management Institute (TPMI). The TTA, was formed by the merger of two other existing training programs: the Virginia Local Technical Assistance Program (LTAP) and the Virginia Transportation Professional Development Program (TPDP).

Please visit the web-site below for more details:

# LOCALLY ADMINISTERED PROJECTS CORE CURRICULUM TRAINING

## CORE TOPICS ADMINISTERING FEDERALLY FUNDED PROJECTS

**"I WANT TO BE THE FIRST TO FINISH MY LAP CORE CURRICULUM."**

*"To be a better runner you need a strong core."*

To successfully administer locally administered projects-you need a strong **core curriculum** of courses. In addition to the first two LAP Manual Modules, there are FHWA on-line training courses that will strengthen your core knowledge of federally funded LAP's. They are listed below:

1. NHI-[Introducing Highway Federal Aid](#)
2. NHI -[Introduction to NEPA & Transportation Decision-making process](#)
3. NHI-[Real Estate Acquisition under the Uniform Act: Overview](#)

## LAP MANUAL TRAINING MODULES

We are very excited about the development of our first two LAP Manual Training Modules.

Module One: [Introduction to Locally Administered Projects](#)

Module Two: [Locally Administered Projects for the Local Government Manager](#)

Please take some time to access the modules and look at the new and improved LAP Manual on our web site.

<http://www.virginiadot.org/business/local-assistance.asp>

**"WOW, THE NEW LAP MANUAL HAS IT ALL AND MORE. I CAN'T PUT IT DOWN."**

**NOW, THAT'S A SMART BIRD!**

"We strongly advise every project manager review and complete all five core sections. No doubt that the most experienced PM's will learn something."

VDOT is committed to developing programs and processes that provide local governments the necessary tools to successfully administer transportation programs and that provide consistent requirements so federal and state stewardship and oversight obligations can be met and projects can be implemented in the most efficient and effective manner.
